

# TelekinEASY T1: Gesture-Driven, Touch-free Interactive Signage

Audience Engagement, Analytics and Survey Tracking

- Simply point to select from the MAGIC spot
- See listings during and after store hours
- Record selections with demographics
- Easy to customize with web-based graphics
- Use flat panels and windows for displays

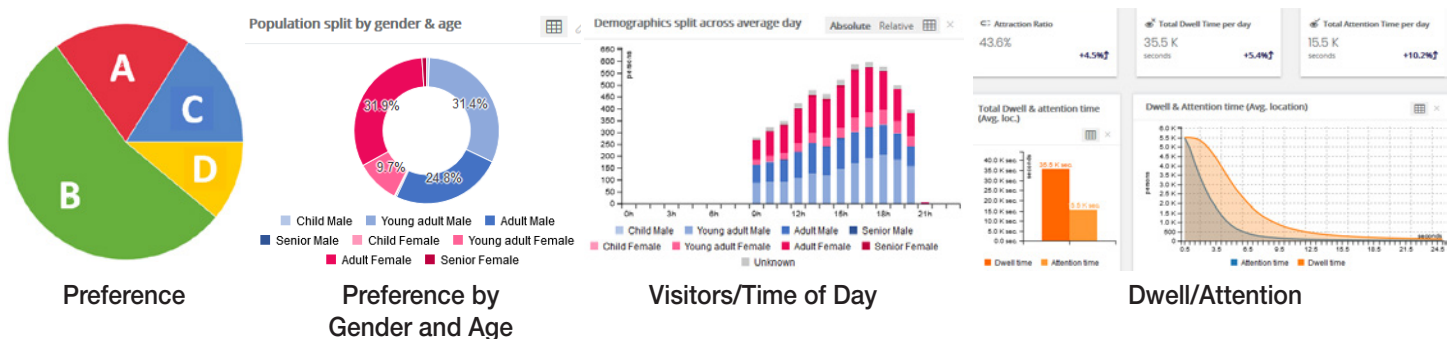

The TelekinEASY system uses machine vision to convert pointing gestures into on-screen selections. It's easy to customize your survey or signage message using web-friendly images, videos and animations.

Highly captivating, experiential real estate display

- Fun for your clients to interact and learn more
- Records guest age, gender, attention, dwell time, mood
- Count and analyze your traffic by time of day/week/month
- Filter the survey and interactive selections by demographic

## Easily customize your survey and see actionable results
