

TelekinEASY T1: No-Touch Interactive Signage

- Simply point to select without touching!
- A fun “ding-dong” sound confirms your selection
- No-Touch = No-Germs
- Made possible by computer vision
- Use any TV or display projected onto a store window
- Easy to customize with your web graphics
- Demographics & analytics module is available

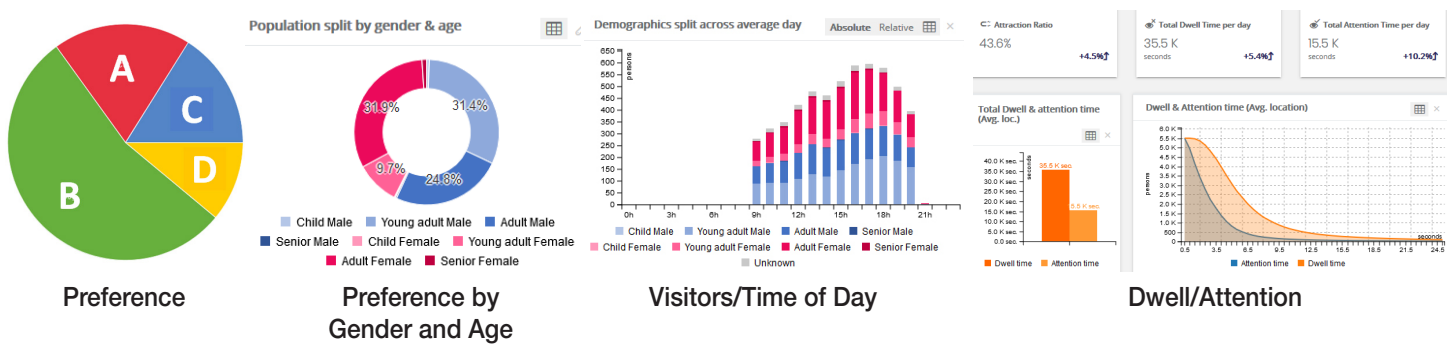

The TelekinEASY system uses machine vision to convert pointing gestures into on-screen selections. It's easy to customize your survey or signage message using web-friendly images, videos and animations.

Germ-Free Interactive Signage

- Fun to use and interact without touching
- Use the analytics plug-in option to learn about the users
 - ✓ Record guests age, gender, attention and dwell time
 - ✓ Count and analyze your traffic by time of day/week/month
 - ✓ Filter the survey responses by demographic

Easily customize your survey and see actionable results
