

Phoenix College Continues To Expand Its HD Capabilities With Addition Of Hitachi CP-WX625 3LCD Projectors

The Phoenix College campus of Maricopa Community Colleges in Arizona has installed Hitachi projectors in approximately 130 classrooms campus-wide, 50 of which are the **CP-WX625** WXGA 3LCD projector. Phoenix College, a facility located on 49 acres, is the flagship college of the Maricopa Community Colleges. This district now ranks as the nation's largest community college system and the single largest provider of higher education and career training in Arizona.

OPPORTUNITY

Phoenix College needed an HD-capable projector for use in its biology classes.

HITACHI SOLUTION

Hitachi CP-WX625 projectors, which offer WXGA resolution and are specially designed for use with widescreen-format laptops and imaging applications that use 16:10 aspect ratios. Additionally, the CP-WX625 features an HDMI terminal, allowing digital signals such as DVD players/recorders and HD to be transmitted digitally to the projector.

RESULT

Phoenix College has created a more dynamic learning experience for its students with the installation of the Hitachi CP-WX625 projectors.

"We started purchasing Hitachi projectors in 2000 and it was one of the best decisions I ever made. Knowing the kind of company they are, the kind of service they offer, I couldn't ask for anything better."

– Mike Poplin, Director of Media Services at Phoenix College

Mike Poplin, Director of Media Services at Phoenix College, opted for the Hitachi **CP-WX625** projectors, sold through Troxell Communications, when looking for an HD-capable projector to use for biology classes. "Learning is a visual experience, therefore higher grade projectors and clear images provide a more immersive learning experience," Mr. Poplin said. "The key for us when standardizing with Hitachi is having that high-quality video, but also the customer support that Hitachi is known for."

Mr. Poplin has also supported the use of Hitachi technology at other campuses within the Maricopa Community Colleges system. "I have shared our projectors and Hitachi equipment with some sister campuses and they have adopted them as part of their technology," Mr. Poplin said. "Hitachi has been outstanding in providing technical support when we need it. They will conduct workshops with our staff and faculty to make sure we know how to use the technology with ease."
