Hitachi Provides Education Market With An Array Of All In One Technology Solutions At TCEA 2010

-- Bring Learning To Life With Hitachi Interactive Bundle Solutions --

Austin, Texas, February 10, 2010 – At TCEA 10, Hitachi America, Ltd., Business Group (Booth #2365) is offering educators the latest in turnkey education presentation technology. Featuring the new Wide and Stimulus Bundles, all of the products being showcased represent the latest in technology within their categories.

Hitachi America, Ltd. is introducing the CP-DW10N projector, featuring a short throw distance of three feet that projects an 80-inch image, eliminating image obstruction in front of the screen. The CP-DW10N can be controlled and maintained with Hitachi's PJMan Projector Management Software through a LAN network connection, providing the ability to network, control and maintain the projectors remotely. The network functionality is capable of controlling multiple projectors in different rooms, as well as monitoring for functions such as remaining lamp life.

In addition, the Hitachi CP-DW10N features WXGA (1280 x 800) resolution and a 16:10 aspect ratio, making the projector compatible with widescreen laptop computers and providing the ability to project on an 88-inch-wide interactive whiteboard from a distance of 37 inches.

Two new bundle solutions are also being introduced by Hitachi America, Ltd. The Wide Bundle combines the Hitachi CP-DW10N short-throw projector, the Hitachi 88-inch wide multi touch interactive whiteboard, and a custom-designed wall mount all into one seamless solution. Mounted on the wall arm at the top of the board, the CP-DW10N's short-throw capability greatly reduces the shadow cast on the StarBoard from the presenter and offers a better viewing experience in the classroom. Hitachi's included StarBoard MultiTouch Software allows two students to work simultaneously on the board and easily annotate with their finger or a stylus.

The second new bundle solution, the Stimulus Bundle, combines the Hitachi CP-D10 short-

throw projector, the Hitachi StarBoard FX-77GII 77-inch interactive whiteboard, and a custom-designed wall mount. Mounted on the wall arm, the projector's short-throw capability greatly reduces the shadow cast on the board from the presenter and offers a better viewing experience for students. The Stimulus Bundle is the premier low-cost option for education environments.

At TCEA, Hitachi America, Ltd, is also showcasing its Perfect Fit Bundle and Ultra Short Throw Bundle. The Perfect Fit Bundle combines the Hitachi CP-A52 ultra short-throw projector and the Hitachi 77-inch StarBoard. The CP-A52 with Perfect Fit Technology enables the presenter to adjust four corners of the image, one by one. The Ultra Short Throw Bundle includes the CP-A100 ultra short throw projector and a Hitachi interactive whiteboard, providing an optimal viewing experience, even in small classrooms.

"We developed all of our presentation technology solutions to offer the best possible interactive experience in the classroom," said John Glad, product manager, Hitachi America, Ltd. "By combining our latest in projector technology and our revolutionary interactive whiteboards, we are giving educators more options than ever to meet whatever challenges they may face in their specific environment. At the same time, we are also ensuring that users are achieving the best experience with a complete Hitachi solution."

Manufacturer Suggested Retail Price for Bundle Solutions:

- Wide Bundle Solution: \$4,595.00
- Stimulus Bundle Solution: \$3,289.00
- Ultra Short Throw Bundle Solution: \$5,295.00
